Introducing Commure

## Healthcare, meet the world's first operating system designed just for you.

Care shouldn't come with compromise. That's why we're rearchitecting healthcare from the inside out.

Our intelligent operating system and modern applications connect, protect, and empower every person in the health ecosystem — from clinicians and staff to innovators and payors.

Together, we are building a vibrant health ecosystem that advances care through collaboration.

Our sophisticated technology — paired with deep clinical expertise — powers scalable innovation for exceptional care.

Digital health innovators, health systems, and health plans drive powerful care delivery transformations and meaningful innovation with our four-layer approach:

Commure Create
(includes Developer Portal)

Visualization

Integration Engine

HL7 (all versions), FHIR, x12, SOAP, BPI & Modern APIs

04 Create

Create or customize scalable solutions with pro-code or intuitive low- or no-code tools.

Supports: Innovation, Time to Value

03 Accelerate

Accelerate deployment of ready-to-launch applications to boost clinical efficiency, optimize financial performance, and protect your workforce.

Supports: Financial, Clinical, and Operational Performance

02 Surface

Surface your most essential data in the moment to deliver informed and timely care.

Supports: Provider Experience, Patient Experience

01 Unify

Unify data for a comprehensive and neatly packaged patient record.

Supports: Quality of Care, Cost Savings

commure

Commure Applications

Our out-of-the-box solutions are ready for you right now.

125K clinicians and staff across **460 healthcare facilities** are using Commure's intuitive and mobile-friendly original applications.

Commure Care Desktop Mobile

Clinical Documentation

Capture robust, data-rich clinical notes for clinicians on the go.

Clinical Results Viewing

Access comprehensive patient data anytime, anywhere.

ePrescribing

Quickly submit accurate prescriptions to a patient's local pharmacy at discharge.

Secure Messaging

Securely message with collaborating providers using real-time patient information.

CPOE

Submit orders with fewer clicks, taps, and screens.

Medication Reconciliation

Seamlessly track and transition patient medications from home to hospital and back.

Commure Perform Desktop Mobile

Charge Capture

Enter provider charges at the point of care or anywhere, quickly and easily.

Charge-Note Reconciliation

Automatically match clinical notes to charges to capture lost revenue.

Financial Reporting

Gain new insights into charge information with visual dashboards and detailed reports.

Commure Strongline RTLS

Workplace & Staff Safety

Real-time workforce duress and location services for patient safety intervention.
