

Workplace violence is an epidemic in healthcare.

75%

of all workplace assaults occur in healthcare settings

Only

30%

of all incidents of workplace violence are actually reported

“My concern for staff safety literally kept me awake at night as a health system CEO, and I didn’t know how to address it effectively. I believe that the Strongline system is a transformational tool for confronting this problem. It is affordable and elegantly uncomplicated.”

Howard Grant, JD, MD
Retired CEO, Lahey Health

Commure Strongline

Taking preventive action against workplace violence has never been easier or more effective with Strongline. We offer the best defense against workplace violence.

An Elegantly Simple and Affordable Solution

With the Strongline staff safety system, health systems can directly address workplace violence within their organization through a cutting-edge duress alerting system that:

- Enables any staff member to instantly summon help from nearby staff and security personnel to their exact location for early intervention and de-escalation.
- Protects staff with wearable badges that work at any health system facility covered by Strongline’s real-time BLE location services.
- Is installed rapidly (<1 week for a 400-bed hospital) with no interference with existing clinical systems.
- Scales easily and affordably across any healthcare enterprise with a SasS subscription model.
- Tracks duress events with customizable reporting to help leadership and security teams take appropriate action.

Purpose-Built for Healthcare

Co-developed in partnership with:

Strongline was created with the sole purpose to prevent workplace violence against frontline healthcare workers.

99%

of badge wearers feel their organization is trying to provide a safer workplace

93%

of badge wearers feel a sense of safety when dealing with a difficult patient

Make an immediate and meaningful impact on your staff's sense of safety at work.

 Jefferson Health.

“My staff loves the system. They know that when they press the button, someone's coming. The morale in the unit has definitely improved — staff feel like the hospital administration has actually listened to them. I would not be comfortable working for another organization that did not have this device, because I would feel that they don't take their staff safety seriously.”

Nurse Manager

Investing in a safer work environment has a direct impact on essential healthcare business imperatives today.

Improve Retention & Engagement

27%

Higher rate of job enjoyment and likelihood to stay among staff who perceive their work environment is safe.
