

Commure Strongline Staff Safety System

Purpose-built to help
reduce workplace violence
in healthcare

Commure Strongline is a powerfully simple duress-alerting badge that puts the power in caregivers' hands to call for help whenever and wherever they need it.

With a quick double press of the button on their Commure Strongline badge, your frontline employee's real-time location is identified and instantly sent to security, nearby colleagues and subscribed responders to intervene and assist with de-escalation.

Connect, Protect, and Empower Your Workforce

Do more than talk about security – invest in a culture of safety. When a team member presses their safety badge, they know that help is on the way. The Commure Strongline duress alert system empowers your frontline staff to prevent workplace violence before it starts. The Commure Strongline staff safety system consists of discreet, wearable duress badges, and gateways installed throughout your facilities.

Improve Candidate Recruitment and Employee Retention

Show your employees and job candidates that nothing is more important to your organization than their personal safety. Installing Commure Strongline in your facilities can help improve:

Employee retention rates

27% higher rate of job enjoyment and likelihood to stay is reported among employees who perceive their work environment is safe

Recruitment costs

Facilities report spending an average of **\$4 - \$8 million per year** on replacing nurses that leave their job

Staff feelings of security at work

93% of badge wearers feel a sense of safety when dealing with a difficult patient

Employee morale

99% of healthcare staff who use Commure Strongline feel their organization is trying to provide a safer workplace

We're dedicated to your team's safety

The Commure Strongline team is here to support you in creating a safer work environment for your teams.
